## **IMC to Assist with Program Management Support for VA Health Registries Projects**

Dulles, VA – [Innovative Management Concepts, Inc. \(IMC\)](#), a systems engineering and information technology company, is pleased to announce that it will be participating as a part of a team on a task order that will support the U.S. Department of Veterans Affairs’ (VA) Office of Information and Technology (OI&T) Product Development Program by providing program management office support for health registries (HREG) projects.

The task order was order was awarded under the VA’s Transformation Twenty-One Total Technology (T4) contract vehicle to [Creative Computing Solutions, Inc. \(CCSi\)](#), a leading provider of health services, program management, cyber security, and enterprise systems engineering to the Federal government. IMC is a part of the team that will execute the task order along with M Powered Strategies (MPS).

The VA’s HREG projects facilitate and improve healthcare decision making for veterans and their dependents suffering from various health-related diseases and disorders. Under the new task order, CCSi, IMC, and MPS will support the following registries: Converged Registries

Solutions, Clinical Case Registry, Military Eye Injury Registry, Traumatic Brain Injury Registry, and Breast Cancer Registry.

The collective expertise CCSi, IMC, and MPS bring to the VA health registries will ensure veterans receive the support they deserve.

###
