IMC Wins ITES-3S Small Business Contract Vehicle to Support Army, DoD, and other Federal Agencies

Dulles, VA – [Innovative Management Concepts, Inc. \(IMC\)](#), an information technology services and solutions provider, is pleased to announce that it is the recipient of an Information Technology Enterprise Solutions-3 Services (ITES-3S) Small Business contract to provide industry best practice, best value, and non-personal services to enable a broad range of enterprise-level support services for information technology integration and service management activities to the Army, other Department of Defense (DoD) agencies, and all other Federal agencies in the United States and across the globe.

The U.S. Army Computer Hardware, Enterprise Software, and Solutions (CHESS), in coordination with the Army Contracting Command, Rock Island (ACC-RI), selected qualified contractors to support the Army enterprise infrastructure and infrastructure goals with IT services worldwide (inside the contiguous United States and outside the contiguous United States, including warzone areas). The Army sought out contractors in the ITES-3S process who are willing to partner with the Army to fulfill its mission. The Army/contractor partnership will reflect the attributes of an open, collaborative, and customer-oriented professional relationship.

The scope of the ITES-3S vehicle includes the Command, Control, Communications, Computers, and Information Management (C4IM) requirements as defined in Army regulations. Additionally, ITES-3S will include the services and solutions necessary for the Army and other services to transition from current service-centric information environments to the enterprise Joint Information Environment (JIE) as directed by the DoD CIO.

Through our participation in the ITES-3S contract vehicle, IMC is proud to support the CHESS mission to be the primary source to support the Warfighter's information dominance objectives by developing, implementing, and managing commercial IT contracts that provide enterprise-wide, net-centric hardware, software, and engineering and support services for the Army. IMC has been supporting the Army's IT requirements since 2000 on multiple contracts.

###
