IMC Partners with Triple-I to Win Veterans Affairs T4 Next Generation Contract

Dulles, VA – [Innovative Management Concepts, Inc. \(IMC\)](#), a Service-Disabled Veteran-Owned Small Business, announces its partnership with prime contract-holder, Information Innovators Inc. (Triple-i), on the Department of Veteran’s Affairs’ (VA) Transformation Twenty-One Total Technology Next Generation (T4NG) Indefinite Delivery/Indefinite Quantity (IDIQ) vehicle.

Triple-i is one of 24 awardees on the new contract, which has a base ordering period of five years with one five-year option period and a program ceiling of \$22.3 billion. Through this vehicle, the VA will procure information technology service solutions including technical support, program management, strategy planning, systems/software engineering, enterprise network engineering, and cybersecurity, among other IT- and health-related IT requirements.

IMC has been supporting the VA as a prime contractor and subcontractor since 2007 on multiple Office of Information and Technology, Veterans Benefits Administration, Veterans Health Administration, Board of Veterans Appeals, and VA Construction and Facilities Management projects. IMC provides the VA with software quality assurance, software development, web services, IT technical services and project management services.

IMC’s President and CEO, Dr. Robert Might, stated, “We’re very pleased to be a part of Triple-i’s VA T4NG Team – we’ve worked with Triple-i for several years on multiple VA and federal projects and they’re a great partner. We’re a sub to Triple-i now on the National Center for Ethics in Healthcare (ECWeb) project. I’m confident they will continue to provide superior IT services to the VA as a T4NG prime.”
